Invisible Cap "InvisiCap 3000"

Product Code: ACME-INV-3000-XL
Category: Quantum Optics & Camouflage
List Price: $4,999.99

Product Overview

The InvisiCap 3000 is the flagship achievement of ACME Corp's Quantum Physics Division. Visually styled as a classic bowler hat, its lining conceals integrated photon-bending micro-emitters. It allows the user to completely disappear from both visible light and infrared spectrums.

Technical Specifications

- **Power Source:** ACME-NUC-2 Isotopic Micro-Cell (runtime: up to 4.5 hours per charge).
- **Activation Time:** 1.2 seconds after pressing the button inside the hat crown.
- **Invisibility Radius:** Covers the wearer and tightly fitting clothing (up to 120 kg total weight).
- **Net Weight:** 340 grams.

Safety Instructions & Warnings

- **Important:** This product DOES NOT work during heavy rain (water droplets will outline the user's silhouette).
- **Warning:** The hat does not mask body odor or snoring sounds.
- **Side Effects:** Prolonged use (exceeding 8 hours daily) may induce temporary identity dissociation.

Frequently Asked Questions (FAQ)

- **What should I do if I drop the active cap on the floor?**
  Use the ACME-DET-1 Cap Wave Detector (sold separately) or gently sweep the floor with a soft broom.
- **Does the cap protect against police radar?**
  No, the cap only masks the optical and thermal imaging spectrums.
